The Developer

St James was established in 1996, originally as a joint venture with Thames Water. The company has established a reputation as a design-conscious developer regenerating brownfield sites and transforming them into attractive developments whose design not only creates desirable places to live, but also has a positive impact on the environment. In White City - as in every location St James works in - this is achieved through a combination of excellent design, sensitive landscaping, sympathetic restoration and impeccable standards of sustainability, building communities that will thrive today and for years to come.

St James is a proud member of the Berkeley Group, a UK leader in the visionary delivery of major urban regeneration schemes. The Group has been responsible for shaping much of the modern development along Central London's riverside, replacing former industrial areas with vibrant places to live, work and play.
